Different from water channel

1. The die casting aluminum radiator is made of world famous brand material: ADC12 aluminum, which is corrosion resistant and specially used for casting and molding.
2. As our aluminum radiator is stylish, antirust, light and leak-free, it is very popular with customers worldwide.
3. The die casting aluminum radiator, aluminum heater, electric heater and heat exchanger consist of Al₂O₃ and SiO₂ protective layers which are anti-wear, antirust, and anti-corrosion.
4. Aluminum heater is at the point of 730 liquid aluminum, die cast by 800T-1600T automatic die casting machine, unique TY3318 anticorrosion coating process to ensure safe operation under water quality of PH 12.
5. Sealed by welding technology.
6. Electrostatic spray painting by epoxy resin powder for great smoothness.

Technical Parameters of Die Casting Aluminum Radiator

Model	Dimension (mm)	Central distance (mm)	Working Pressure (Mpa)	Max. Pressure(Mpa)	Thermal Output (W) T=64.5 (W)
YM-B200	270*80*85	200	1.6	3.2	73
YM-B300	375*80*85	300	1.6	3.2	119
YM-B350	427*80*85	350	1.6	3.2	137
YM-K500B	575*70*70	500	1.6	3.2	105
YM-J500B	575*80*80	500	1.6	3.2	150
YM-B500	582*80*85	500	1.6	3.2	175
YM-C500B	582*80*96	500	1.6	3.2	179
YM-B600	682*80*90	600	1.6	3.2	210
YM-F1200	1262*80*80	1200	1.2	2.6	240

Thank you for visiting our website. As an experienced die casting aluminum radiator manufacturer in China, we produce a range of domestic radiator, Youmay heater, and other kinds of heat exchanger.

Our radiators are high quality and low price, and are accompanied by considerate customer service. As a result, they are widely used in France, Iran, Russia, Western Asia, and North African countries, among others.

We welcome you to try our aluminum radiator. For ordering and inquiries, please feel free to contact us.
